

ELYTE

THE FUTURE OF PERFORMANCE IS ELYTE

FAIRWAY

FEATURES & BENEFITS

Penetrating Flight With Low Spin

- The compact shape and deeper face of the Triple Diamond fairway wood allow players to shape shots with ease and control.
- A forward weight screw promotes a lower spin rate and a more piercing ball flight for added workability.

All New Tungsten Speed Wave for consistently fast ball speeds

- Featured on the 3-7 wood, the new Tungsten Speed Wave is a 35g weight that positions mass low and forward to promote fast ball speeds.
- This new, innovative design is engineered specifically to enhance misses low on the face.

New Step Sole for Efficient Turf Interaction & Improved Centre Face Contact

- Engineered for cleaner contact, the new Step Sole minimises skidding, ensuring smoother, more solid strikes.
- Developed through extensive studies and the success of the Apex UW, this sole shape delivers better turf interaction for consistent results.

Ai 10x Face for Optimal Launch and Tight Downrange Dispersion

- Our most advanced Ai face to date, the new Ai10x Face delivers 10x more control points than the Ai Smart Face.
- Designed with our C300 Face cup to produce exceptionally fast ball speeds, tight dispersion, and optimised launch across the face.
